FFVA MUTUAL
THE CHOICE FOR WORKERS' COMPENSATION

ACCIDENT ANALYSIS WORKSHEET

COMPANY	PERIOD COVERED FROM: TO:
LOCATION	DATE PREPARED

Department Location & Supervisor Type of Accident										TOTAL	% OF TOTAL
TOTAL											
% OF TOTAL											100

The chart indicates the frequency (numbers) of accidents in the various categories. This is shown vertically and horizontally. By examining the percentages, it becomes evident what type of accident or which department should receive priority attention. For example, if it is easily seen that the two types of accidents that occur most frequently are Struck Against and Foreign Body in Eye, the departments where these accidents occur most often should receive special attention.
